SUBJECT INDEX

Additives: Control of food additives, 69
Additives: Food additives: recommendations for harmonization and control, 151
Automatic: New method for computer management of baking ovens, 111
Automation: *see* Distributed control systems, 32

Baking: *see* Automatic, 111
Botulism: Botulism in Brazil, 136
Botulism: Restaurant-associated botulism outbreaks in North America, 139

Codex Alimentarius Commission: *see* Additives, 151
Codex Alimentarius: Food safety control systems and developing countries, 17
Colorimetric end-point: *see* Free fatty acid, 105
Computer: *see* Ladder logic, 98
Contamination: *see* Mycotoxin, 15
Controlled atmosphere packaging: Controlled atmosphere packaging of chilled meat, 74
Cooling in vessels: *see* Thermal design, 230

Department of Health: *see* Food Safety Bill, 215
Developing countries: *see* Codex Alimentarius, 17
Distributed control systems: Automation in the food processing industry: distributed control systems, 32
Due diligence: Due diligence and quality assurance in the UK, 117
Dynamic model: *see* Extruder, 179

EC directive: *see* European Community, 130
Education: Education in food control, 12
Epidemiology: *see* Botulism, 136
Epidemiology: *see Prototheca stagnora*, 185
European Community: Food Control in the European Community, 130
Extruder: Feedforward control model for a twin-screw food extruder, 179

Factory enforcement: *see* Food Safety Bill; 219
Fat content: *see* Fish, 47
Feedforward control: *see* Extruder, 179
Fish: Hand-held instrument for fat/water determination in whole fish, 47
Food Safety Act: UK Food Safety Act, 196
Food Safety Bill: involvement of the Trading Standards Officer in implementing the new UK Food Safety Bill, 219
Food Safety Bill: Legislation incorporated in the new UK Food Safety Bill, 197
Food Safety Bill: Regulations and factory enforcement arising from the UK Food Safety Bill, 199
Food Safety Bill: Role of the Department of Health in the implementation of the new UK Food Safety Bill, 215
Food buyers: Food buyers – the need to be well informed and technically aware, 244
Food monitoring: *see* Statistical analysis, 40
Food processing: *see* Ultrasonic, 54
Free fatty acid: On-line free fatty acid titration using colorimetric end-point detection, 105
Frying oil: *see* Sensor, 164

Glucosinolate: Novel and rapid methods of glucosinolate analysis with particular reference to their application to 00-rapeseed, 84

HACCP: HACCP and food control, 131
HACCP: Hazard analysis in hygienic engineering, 133
Harmonization: *see* Additives, 151
Harmonization: Scientific bases for harmonizing the meat trade, 11
Harmonization: *see* US Government, 66
Heat flux: *see* Automatic, 111
Heat treatment: *see* Irradiation, 223
Heating in vessels: *see* Thermal design, 230
Hygienic engineering: *see* HACCP, 133

In-line: *see* Near infrared spectroscopy, 143
Irradiation: Assuring the safety of irradiated food, 207
Irradiation: Combination of irradiation with mild heat treatment, 223
Irradiation: Food irradiation and its role in improving the safety of security of food, 211
Irradiation:Irradiation of food, 205

LINK programme: LINK Food Processing Sciences Programme, 203
Ladder logic: Development of a ladder logic software for flexible process control, 98
Legislation: *see* Food Safety Bill, 197, 199
Listeria monocytogenes: see Listeriosis, 27
Listeriosis: Foodborne listeriosis: risk from meat and poultry, 27

Mathematical model: *see* Thermal design, 230
Mathematical technique: *see* Near infrared spectroscopy, 143
Meat: *see* Controlled atmosphere packaging, 74
Meat: *see* Harmonization, 11
Meat: *see* Irradiation, 207
Meat: *see* Listeriosis, 27
Mycotoxin: Global concern on mycotoxins, 15

NADH: *see* Sensor, 236
Near infrared spectroscopy: Use of near infrared spectroscopy in the food industry with particular reference to its applications to on/in-line food processes, 143
Nutrition: *see* US Government

On-line: *see* Free fatty acid, 105
On-line: *see* Near infrared spectroscopy, 143
On-line: *see* Process control, 36

Poultry: *see* Irradiation, 207
Poultry: *see* Listeriosis, 27
Poultry: *see Prototheca stagnora,* 185
Preservation: *see* Irradiation, 223
Process control: Process monitoring and control on-line in the food industry, 36
Process control: *see* Ladder logic, 98
Process control: *see* LINK programme, 203
Process control: *see* Statistical analysis, 40
Prototheca stagnora: Isolation of *Prototheca stagnora* from frozen poultry meat, 185
Public health: *see Prototheca stagnora,* 185

Quality assurance: *see* Due diligence, 117

Quality control: Quality control of water as raw material in the food industry, 79
Quality control: *see* Sensor, 244
Quality: *see* Sensor, 164

Rapeseed: *see* Glucosinolate, 84
Rapid test: *see* Glucosinolate, 84
Regulation: *see* Food Safety Bill, 199
Restaurant associated: *see* Botulism, 139
Risk assessment: *see* Additives, 69

Safety: *see* Codex alimentarius, 17
Safety: *see* Food Safety Bill, 219
Safety: *see* Irradiation, 211
Safety: see US Government, 66
Sensor: Application of NADH fluosensor for on-line biomass measurements in yeast fermentation on whey substrates, 236
Sensor: Development and evaluation of a novel sensor for the in situ assessment of frying oil quality, 164
Sensor: Sensors for quality control, 244
Sensor: *see* Process control, 36
Sensor: *see* Ultrasonic, 54
Statistical analysis: How good are your results? An approach to qualitative and quantitative statistical analysis for food monitoring and process control systems, 40

Technological evaluation: *see* Additives, 69
Thermal design: Design considerations for heating or cooling materials in vessels, 230
Trade: see Harmonization, 11
Trading Standards Officer: *see* Involvement of the Trading Standards Officer in implementing the UK Food Safety Bill, 219
Twin-screw: *see* Extruder, 179

UK Government: Food control – the way ahead, 9
US Government: Prospects for food control, 66
Ultrasonic: Ultrasonic temperature measurement and its potential for food processing systems, 54

Water content: *see* Fish, 47
Water: *see* Quality control, 79
Whey: *see* Sensor, 236

Yeast fermentation: *see* Sensor, 236
